Model	Description	Battery run time (up to h)	Solution/recovery tank (l)	Working width (up to mm)	Pressure on the brush(es) (up to kg)	Supply/traction (V)	Productivity theoretical (up to sqm/h)
CB-1	The autonomous technology that helps professionals improve cleaning productivity. While CB-1 deals with the routine cleaning of large, high-traffic floors in warehouses, airports, shopping centers, supermarkets and schools, specialized personnel can take care of the more demanding tasks. The job is fully traceable thanks to the monitoring system FFM - Fimap Fleet Management.	4 (Li-ion)	40/40	570	15	24/aut.	1710

We develop solutions that help keep productivity up while optimizing the use of resources.

Scrubbing without using chemical products

Water, detergent and energy savings
Noise level reduction

Water and detergent savings

Increased productivity with the re-use of the detergent solution

Reduced consumption and monitoring throughout the life cycle

Reduced energy consumption and improved battery efficiency

Multi-stage filtering, to deliver clean air back into the room

Reduced use of fossil fuel

Optimized energy consumption

Resource savings

CHEMICAL-FREE CLEANING SOLUTION

The new Fimap technology for cleaning without chemical products

The exclusive AQUAE® technology activates the chlorine molecules naturally present in normal softened tap water, to produce an effective cleaning and sanitizing solution. It's safe and eco-friendly because it's made up of natural elements: water and electricity.

Built with recycled plastic

WALK-BEHIND								
Model	Description	Versions	Battery run time (up to h)	Solution/recovery tank (l)	Working width (up to mm)	Pressure on the brush(es) (up to kg)	Supply/traction (V)	Productivity theoretical (up to sqm/h)
Genie XS	Perfect for cleaning small, cluttered spaces with the greatest ease. It is powered with a lithium ion battery that allows to perform many, short and targeted cleaning operations during the same day. Ideal for cleaning shops, offices, laboratories, restaurants and hotels. Versions available: disc	-	1.15 (Li-ion)	3/4	280	10	36/semi aut.	900
GL-GxL	Designed with adjustable pressure up to 30 kg for GL and 40 kg for GxL, making it ideal for small spaces in hard contexts such as production lines, processing and storage systems, assembly lines, mechanical workshops, kitchens and restaurants. The parabolic squeegee ensures perfect 360° cleaning, with backward drying too. Versions available: disc and orbital	GL Pro	3 (Li-ion)	15/17	355	30	24/semi aut.	1000
		GxL Pro		25/27	430	40	24/semi aut.	1200
		GxL Bt/Orbital Pro	2 (Li-ion)	-	-	-	24/aut.	1720
iMx	Guarantees user-friendliness, reduced consumption of resources, little maintenance, reliability over time and low costs of ownership. It is ideal for cleaning schools, small supermarkets, storage areas, showrooms, healthcare environments and hotels. Versions available: disc	iMx B/Bt	4 (Li-ion)	40/40	510	27	24/semi aut. 24/aut.	1785
EMx	Compact, high-performance machine providing efficiency and effectiveness in a variety of contexts. Designed for sustainable cleaning with reduced consumption of resources. A HEPA filter can be fitted to clean the intake air before it is delivered back into the room. Suitable for supermarkets, warehouses, production sites, gyms, car showrooms, workshops and public contexts. Versions available: disc, cylindrical and orbital	EMx 43/50 B Basic	4 (Li-ion)	40/40	430 510	23	24/semi aut.	1720 2040

RIDE-ON								
Model	Description	Versions	Battery run time (up to h)	Solution/recovery tank (l)	Working width (up to mm)	Pressure on the brush(es) (up to kg)	Supply/traction (V)	Productivity theoretical (up to sqm/h)
BMg	Compact but providing outstanding comfort, its innovative fittings ensure power and performance whatever the conditions. Ideal for the cluttered places typically found in the hotel sector, wellness centers, gyms, supermarkets and schools. Versions available: disc and orbital	BMg 56/65 Pro/Plus	3 (Li-ion)	60/60	560 655	50 60	24/aut.	2270 3220
		BMg Orbital Pro/Plus			500			2525
MMg	The compact design and safety fittings, and the power of the cleaning functions, make it ideal for busy places because it gives good results in one single step and is safe for both the environment and the people nearby. Ideal for supermarkets, warehouses, shopping centers, production sites, swimming pools, gyms, car showrooms and workshops. Versions available: disc, cylindrical and orbital	MMg Basic/Plus	3.15 (Li-ion)	110/110	850	110	24/aut.	4530
		MMg Cylindrical Basic/Plus			940			3870
		MMg Orbital Basic			710			4260
Magna	Powerful, robust model suitable for demanding sectors requiring heavy duty cleaning. The dual 3-stage vacuum motor guarantees that the floor is dry and safe at the first pass, without the need to cordon off the freshly cleaned area. Ideal for supermarkets, warehouses, shopping centers, production sites and logistics centers. Versions available: disc and cylindrical	Magna Basic/Plus	6.30 (Li-ion)	190/195	1050	150	36/aut.	5400
		Magna Cylindrical Basic/Plus			1220			4950
GMG	This is the largest and most powerful model of the range, guaranteeing the best results in the shortest possible time in large spaces. It's invincible, whatever the conditions, working at 9 km/h and even cleaning ramps with gradients of up to 20%. Ideal for large logistics centers, warehouses, car parks, railway stations, airports and shopping centers. Versions available: disc and cylindrical	GMG Pro / Plus	10 (Li-ion)	300/350	1200	250	36/aut.	12000
		GMG Cylindrical Pro/Plus			1300			13000
GMG ROAD	All the power of GMG is approved for use on the road in the full electric GMG ROAD street scrubbing machine version. The same cleaning power, ability to overcome ramps and working autonomy are enhanced with equipment for safe road use. It is available with cabin, with or without air conditioning and heating. Versions available: disc and cylindrical	GMG ROAD Pro/Plus			1200			12000
		GMG ROAD Cylindrical Pro/Plus			1300			13000

RIDE-ON								
Model	Description	Versions	Battery run time (up to h)	Solution/recovery tank (l)	Working width (up to mm)	Pressure on the brush(es) (up to kg)	Supply/traction (V)	Productivity theoretical (up to sqm/h)
GMG Combinata	Combines the strength of a real sweeping machine with the power of a big scrubbing machine. One single machine does the work of two, halving the time and costs of the cleaning operation, labour and management. It can clean ramps with a gradient of up to 20% at gross weight. Designed to ensure excellent productivity in large industrial structures, logistics centers, warehouses, car parks, railway stations, airports, shopping centers and trade fair districts.	GMG Combinata Pro / Plus	7 (Li-ion)	300/350	1700	250	36/aut.	17000

ORIGINAL LINE SCRUBBING MACHINES

FIMOP Genie My16 My50 MMx Mxr Mr Magna SMg

WALK-BEHIND									
Model	Description	Versions	Battery run time (up to h)	Solution/recovery tank (l)	Working width (up to mm)	Pressure on the brush(es) (up to kg)	Supply/traction (V)	Productivity theoretical (up to sqm/h)	
FIMOP	It replaces manual systems such as traditional mops in small or highly cluttered spaces, offering all the advantages of mechanized cleaning: fast work, excellent hygiene, and a floor that's immediately dry and safe to walk on. It's the ideal solution for shops, offices, bars, restaurants, porticos and terraces. Versions available: cylindrical	-	1 (Li-ion)	1.2/1	340	-	25,6/semi aut.	300	
Genie	Small and agile, designed for small cluttered spaces. With its innovative parabolic squeegee that moves sideways around the brushes, it can scrub and dry perfectly even on bends, without needing to follow a straight line. Ideal for cleaning shops, laboratories, waiting rooms, gyms and restaurants. Versions available: disc and cylindrical	Genie E	-	7/9	360	17.7	230/50/semi aut. (V/Hz)	-	
		Genie B	1.30 (Li-ion)	8/8	360	20	12/semi aut.	1050	
		Genie Bs	2	10/10	335	14.5	12/semi aut.	1010	
My16	Its simple design makes it easy to use even by non-specialized personnel, and it only needs the minimum maintenance. It guarantees perfect drying even on bends, thanks to the parabolic movement of the squeegee around the brush. Ideal in commercial environments, schools, laboratories and workshops. Versions available: disc	-	1.30	19/15	410	20	12/semi aut.	1215	
My50	Easy to use and ready in just a few seconds, with no need for training. It's compact, passes through standard doors and can be taken from one floor to another using the elevator. The reinforced plastic squeegee is resistant to impact and corrosion, providing lasting robustness and reliability. Ideal for cleaning schools, supermarkets, warehouses, workshops and garages. Versions available: disc	My50 E	-	35/40	510	27.5	230/50/semi aut. (V/Hz)	-	
		My50 B	-	-	-	-	24/semi aut.	1530	
MMx	With its easy, comfortable handling, it raises the hygiene standards even in cluttered places. It offers reliable performance and user-friendliness. The brush head and squeegee support are robust and resistant to impacts. Recommended for supermarkets, canteens, gyms, warehouses, and in the health sector. Versions available: disc	MMx43 B/Bt	4 (Li-ion)	40/50	430	23	24/semi aut./aut.	1200 1750	
		MMx50 B/Bt	-	-	510	-	-	1250 1750	
RIDE-ON									
Mxr	Thanks to its ultra-compact dimensions, it can replace any traditional walk-behind scrubbing machine and complete the cleaning task in a shorter time, with considerable cost savings too. It can pass through traditional doors and supermarket checkouts, and can be transported in elevators. Perfect for supermarkets, schools, wellness centers, hospitals and warehouses. Versions available: disc	-	3 (Li-ion)	67/66	560	15	24/aut.	3000	
Mr	Its strength lies in its basic standard equipment, making it cost effective yet at the same time adaptable to the needs of various sectors. Despite its simplicity, it provides all the basic Fimap technologies for saving resources and reducing waste. It's effective in industrial structures, supermarkets, car parks, hospitals, nursing homes, airports and stations. Versions available: disc and cylindrical	Mr60 B	4 (Li-ion)	110/125	615	30	24/aut.	3660	
		Mr65/75/85/100 B	-	-	660/760/845/1020	60	-	3900/4500/5100/6060	
		Mr70 S	-	-	690	20	-	4140	
Magna	A powerful, effective model that's ideal for medium and large spaces, even requiring heavy duty cleaning. The brush head can be shifted 15 cm sideways to perfectly clean along walls and around shelving. Automatically retracts in the event of obstacles. Reliable and cost-effective for cleaning industrial spaces, logistics centers, stations and airports. Versions available: disc and cylindrical	Magna 85/100 B	4	200/215	850/1000	150	36/aut.	5525/6500	
		Magna 85/100 Bs	-	-	-	63	-	-	
SMg	A large machine with a robust design. The operator sits in a raised position that not only ensures full visibility but is also comfortable when working long shifts. The dual vacuum motor guarantees perfect drying in one step, for greater safety. Ideal in industrial spaces, logistics centers, stations and airports. Versions available: disc and cylindrical. WALK-BEHIND

Model	Description	Versions	Battery run time (up to h)	Debris hopper (l)	Working width (up to mm)	Filtering surface (sq.m.)	Supply/traction (V)	Productivity theoretical (up to sqm/h)
FSM	Push sweeper that makes the cleaning of small areas quick and easy. It's lightweight and easy to handle, with manual traction on both wheels. Its large handle can be height adjusted, and also folds down so the machine can be stored in a small space. Ideal for cleaning interior and exterior spaces in mechanical workshops, condominium service areas, courtyards, warehouses, car parks and petrol stations.	-	-	40	650	-	-	-
FSW5	Small battery-powered sweeping machine designed for practical use and maintenance. The wraparound frame protects the components, but can be completely opened to give full visibility and access for any interventions needed on the machine. FSW5 can be equipped with the multi-stage air filtering system Safe Air, made of a panel filter and a Hepa filter, which cleans the air before returning it back into the environment, making the surrounding space safer for the operator and the people who live in it. Ideal for both indoor and outdoor spaces such as driveways, car parks and warehouses, and in the industrial, HoReCa and automotive sectors.	FSW5 B/Bt	2 (Li-ion)	50	650	3.5 HEPA filter 0.3 µm 99.99% efficiency	12/semi aut/ aut.	2600

RIDE-ON

FSR	Designed to be compact yet without forgoing comfort, ergonomics and maneuverability. The lowered footboard ensures a comfortable and effort-free driving position. Perfect not only for outdoor spaces but also cluttered indoor areas such as industrial structures, warehouses and car parks, or in the hospitality sector. Effective results on carpet floors too, for example in airports, hotels or convention centers.	FSR B	3.3 (Li-ion)	65	1000	3.2	24/aut.	4500
		FSR Hybrid	7.5	24/aut. Hybrid				
FSR7	A next generation sweeping machine that pushes productivity to the maximum. Equipped as standard with the exclusive Force technology to obtain perfect cleaning results even on irregular floors, in one single step. The Safe Air multi-stage filtering system removes particles up to 0.3 µm from the air. Ideal for cleaning and multi-service contractors, for the health sector, large-scale retailing, shopping centers and the most demanding contexts in industry, transportation, car parks and trade fair districts.	FSR7 Basic/Pro/Plus	7 (Li-ion)	105	1300	3.6 HEPA filter 0.3 µm 99.99% efficiency	24/aut.	9100
FSR8	High-performing sweeper equipped as standard with the Force technology which ensures a consistently uniform clean, even on uneven surfaces, in a single pass. It is equipped as standard with automatic emptying system at height. It is recommended for industrial environments, parking lots, transportation sector and exhibition centres.	FSR8 Pro/Plus	5	140	1500	9.5	36/aut.	15000
FS 80/90/110	Robust, reliable sweeping machines. The central brush is the floating type and self-adjusts to keep in contact with the ground all the time. The electric filter shaker keeps the filter clean and ensures constant performance throughout the task. Ideal for collecting solid debris and light dust in industrial areas, car parks and camping sites.	FS80 B/D	4/-	360	1440	7	36 V/hydraulic/ diesel/ hydraulic	11520 12960
		FS90 B/D		400	1540	8		12320 13860
		FS110 B/D/ Bifuel	4/-/-	480	1740	8/7/7	36 V/hydraulic/ diesel/ hydraulic/ gasoline and LPG/hydraulic	13920 15660
FS 100/120	Large sweeping machines for heavy duty applications. Complete access to facilitate routine and extraordinary maintenance. Automatic emptying is from the front, and activated by a hydraulic system. The rear motorwheel traction drive makes the machine safe and maneuverable, ensuring an extremely tight curve radius. Ideal for vast surfaces with large amounts of dust and solid residue in industrial milling and mining structures, port areas, car parks and airports.	FS100 B/D	5/-/-	570	1700	10	36 V/hydraulic/ diesel/ hydraulic	14550
		FS120 B/D/ Bifuel		600	1850	36 V/hydraulic/ hydraulic/ gasoline and LPG/hydraulic	15725	

VACUUM CLEANERS

CANISTER

BACKPACK

TROLLEY

CANISTER									
Model	Description	Tank (l)	Motors (no.)	Air flow (l/s)	Vacuum (kPa)	Max power (W)	Accessory kit (Ø mm)	Recommended use (h/day)	
NANO	Compact and lightweight, with a 700 W engine, it's practical to use and move around. The large rear wheels and the two pivoting front ones provide stability and maneuverability. It can be stored safely and tidily thanks to the tube-holder hook and built-in cable winder. It is perfect for small-medium environments for the daily cleaning of shops, hotel rooms and offices.	10	1	26.5	18	700	32	1	
FV 13.1 Pro	Small but professional, it has a dual filtering level thanks to a cartridge filter and a pocket one in HEPA microfiber. The vacuum tubes are made of chrome-plated steel so they're resistant and reliable over time. On/off foot switch. It is recommended for cleaning contractors, restaurants, industrial kitchens, hotels, cinemas and offices.	13	1	40	20	900	32	4/6	
FV 13.1 GREEN HEPA	A small vacuum cleaner, that's robust and high-performing, made from recycled plastics. It has a dual filtering level thanks to a cartridge H14 HEPA filter and a bag one in HEPA microfibre. It is recommended for cleaning contractors, restaurants, industrial kitchens, hotels, cinemas and offices.								
FV 13.1+ HEPA	Professional vacuum cleaner with all the accessories to ensure optimum comfort and top performance. With a telescopic tube for height adjustment, and a built-in nozzle-holder. It is fitted as standard with a HEPA cartridge filter for excellent filtering of fine dust. It's suitable for cleaning contractors and large-scale tenders, and for use in restaurants, industrial kitchens, hotels, cinemas and shops.			42	22		37		
BACKPACK									
FV9+	Makes it easier and quicker to clean particularly narrow spaces. Comfortable to wear, thanks to its low weight and adjustable padded shoulders. With a tool belt to keep additional nozzles and adapters close at hand. Electrically powered or with lithium batteries, to enable use in places where a cable might hamper movements. Ideal in cinemas and theaters, buses, trains and airplane cabs.	5.7	1	28.9	21.6	950	32	2	
FV9+ B				25	14	300			
TROLLEY									
FV-CART	Trolley model ideal when the operator needs to move often from one place to another. Powered by lithium batteries to guarantee the maximum freedom of movement without the restrictions of a cable. Equipped as standard with a set of accessories housed in the trolley structure. The stair-climbing wheels make transfer effortless, even on steps. Ideal for cleaning contractors, for applications in the world of transportation, on trains, airplanes and buses, in the hotel sector, in offices and waiting rooms.	5.7	1	6.98	8	300	32	2

PLASTIC								
Model	Description	Tank (l)	Motors (no.)	Air flow (l/s)	Vacuum (kPa)	Max power (W)	Accessory kit (Ø mm)	Recommended use (h/day)
FV20.1 WD	Compact and robust, it has a built-in accessory holder housing the standard set of nozzles. Recommended for cleaning contractors, for large-scale tenders when a reliable and cost-effective model is required, and in places like the kitchens and bathrooms of hotels and restaurants.	20	1	29	19	1200	32	1
FV P30.1 WD	Model with a wheeled plastic tank. Recommended for the HoReCa sector, where a single cleaning job might involve cleaning carpet floors but also removing liquids in bathrooms and kitchens, as well as for schools, hospitals and nursing homes.	30	1	54	22	1200	37	4/6
FV P65.2/3 WDM S	Robust vacuum cleaner with 2 or 3 two-stage motors and a wheeled plastic tank. Equipped as standard with a tube to facilitate the drainage of liquids. Recommended for the construction sector, where large areas have to be cleaned and metal, stone and cement waste needs to be collected, as well as for the professional cleaning, car wash and car hire industries.	65	2/3	108 160	22	2400 3600	40	4/6
FV P65.2/3 WDB	Powerful wheeled model with 2 or 3 two-stage motors, a plastic tank, and a tilting system to facilitate emptying. Recommended for intensive use in the industrial and construction sectors, for collecting metal, stone and cement waste, and in mechanical workshops and car wash areas.	65	2/3	108 160	22	2400 3600	40	4/6

COMPACT								
Model	Description	Tank (l)	Motors (no.)	Air flow (l/s)	Vacuum (kPa)	Max power (W)	Accessory kit (Ø mm)	Recommended use (h/day)
FV 30	With WETorDRY technology for vacuuming both liquids and dust separately or simultaneously, without the need to stop and change the filter. With AUTO-CLEAN technology that activates automatic filter cleaning. Recommended in hospitals, hotels, swimming pools, schools and production areas.	30	1	53.7	22	1600	37	4/6
FV 60		60						
FV 80		80		58.7				
FV XP35.1 WD	Powerful and robust model with two-stage motor. It is suitable for intensive use, for removing liquids alongside a single disc machine, and mainly used in the building and construction sector.	35	1	54	22	1200	40	4/6
FV XP110.2/3 WD	Large vacuum cleaners with 2 or 3 motors, with a rotationally moulded plastic tank that makes them extremely robust. Includes a tube for quickly draining off liquids. Ideal for the construction sector, for companies that handle hiring tasks on worksites, and for professional cleaning contractors.	110	2/3	108 160	22	2400 3600	40	4/6

SPRAY-EXTRACTION CLEANERS

FE18

FE P35.1 WD

FE A65.2 DP

FB45

Model	Description	Tank (l)	Motors (no.)	Air flow (l/s)	Vacuum (kPa)	Max power (W)	Accessory kit (Ø mm)	Recommended (h/day)
FE18	Model suitable for removing stains from fabric covers, upholstery, padding and carpet floors, with very quick drying times. Recommended for the automotive and hotel sectors, and in narrow spaces such as on buses or between the rows of seats in cinemas and convention halls.	20	1	44.8	22	1100	40	2/3
FE P35.1 WD	With its compact and robust tank, this machine is handy and practical for small jobs. Recommended for removing stains and cleaning small fabric surfaces, making it ideal for armchairs and carpets in the HoReCa sector, seats in cinemas and theaters, seats on public transport, in car washes and car hire centers.	35	1	54	22	1200	40	2
FE A65.2 DP	Equipped with two motors activated individually by two separate buttons, this machine is characterized by its powerful vacuum that guarantees fast drying. Recommended for the HoReCa sector but also the automotive sector, where the 3-meter hose and manual nozzle facilitate its use inside cars.	65	2	108	22	2400	40	2/3
FB45	It quickly dries carpet floors and rugs cleaned with extraction machines, and can be used on large surfaces since it is easy to move thanks to the trolley handle and wheels. Recommended for hotels and service companies.	-	1	720.2	0.6	520	-	-
